

HOW TO RUG PULL LIKE A KING

Learn how to rug pull and earn
thousands of crypto in a short period
of time.

2025 FULL GUIDE (UPDATED)

WELCOME

Thank you for purchasing my method to understand how rug pulls work and how to execute them. I've created an ebook to help you learn efficiently, so you won't have to waste time searching through Google or YouTube.

My method is regularly updated to stay fresh and effective.

I know many of you are looking for easy money, so let's get started. Keep in mind, it can take between 10 to 20 days to start seeing a substantial income, ranging from \$10,000 to \$30,000 USD. Earning this amount within a month is entirely achievable.

MAKING THE TOKEN

Creating a token today is super easy, no coding required, so there's nothing to worry about. There are plenty of websites that let you create tokens hassle-free.

One great option is MoonTool.org

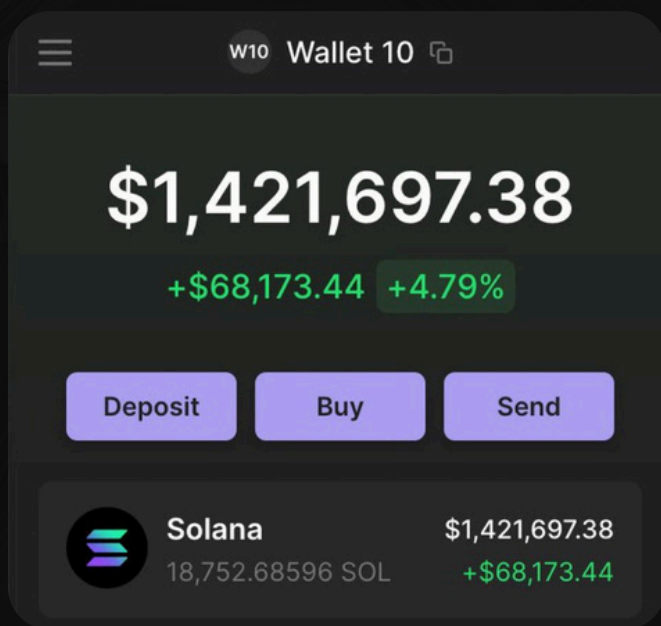

The best part? They offer 30 days of free AI-powered marketing to promote your token, saving you time and helping attract many investors. The only limitation is that they create tokens exclusively on the Solana network, but with free marketing included, that's a small trade-off.

HOW TO NAME YOUR TOKEN?

Naming your token is a crucial step and shouldn't be taken lightly. Avoid choosing a random or generic name just because it sounds "new" or different. Instead, focus on names tied to current trends that people are actively talking about. This could be related to the latest developments in crypto, popular influencers, gaming, or any other hot topic that's generating buzz.

When your token's name taps into what's trending, it naturally creates excitement and hype around your project. This buzz makes it much easier to capture investors' attention and encourage them to invest, as they tend to follow the momentum around popular and talked-about themes.

THIS WAS MADE IN 1 YEAR

The balance you see from my rug pulls was accumulated over the course of one year, so don't assume it happened in just a few days. Making money with rug pulls is straightforward because many inexperienced investors keep pouring money into crypto tokens, hoping to profit. Meanwhile, as the token creator, you're the one who actually makes the money.

CREATING YOUR TOKEN

- Find something that is trending, for example Donald Trump.
- Go to website MoonTool.org
- Enter the details like Token Name, Token Symbol, Description, Add Logo, Supply leave as it is, Authorities & Security also leave it enabled.
- Click on Launch Your Memecoin.

Once your token is created, you don't need to do anything else. Their AI will automatically promote your token for 30 days across popular platforms like Twitter, Reddit, Facebook, Instagram, Telegram, crypto forums, and Discord channels. They use realistic-looking bot accounts to quickly and effectively spread the word, making it easier to attract investors to your token.

WHERE IS THE TOKEN LISTED?

Your token will be listed on Raydium.io, so make sure to buy some of your own tokens before investors start purchasing.

When you see an opportunity to cash out between \$5,000 and \$10,000, go for it and don't wait. You can also cash out earlier if you want, just like I do, but it's not necessary.

This process isn't difficult at all. In today's world, AI handles most of the work, so it's not a big deal.

That's it. This isn't rocket science. Enjoy making real money.
